QUENTIN WOOD

Computer Science Student | Full-Stack Software Developer | XR Developer | MEM Scholar
Golden, CO | 970-765-5725 | quentin.wood14159@gmail.com | linkedin.com/in/quentin-wood141 | quentinwood.me

Education

Colorado School of Mines | B.S. in Computer Science **Expected May 2030**
Golden, CO

Experience

Junior Software Developer | Touch of Care **June 2025 - Present**
Montrose, CO

- Developed and maintained software supporting 200+ staff across multiple Colorado locations serving 400+ patients.
- Managed patient data within private-server and virtual-machine environments, cleaning records to prepare for future automation.

Data Visual Engineer | Mines Formula **August 2026 - Present**

- Helped with telemetry and visualization for a Formula-style racecar
- Created custom plugins to analyze data from 10+ CAN, GPS, acceleration, wheel-speed and temperature sensors at up to 20 Hz
- Built a web interface that enabled team engineers to access the dynamometer network.

Projects

Graduation Day | Unity, C#, OpenXR, XR Interaction Toolkit

- Designed and developed a 3D career-simulation game with multiple interactive job environments for the FBLA Computer Game and Simulation Programming competition which beat 20,000 teams, earning first at the national competition.
- Refined gameplay through iterative testing with approximately 12 playtesters, incorporating feedback into the game's interactive environments.

Olathe Tuxedo Corn Website Rebuild | Astro, TypeScript, HTML, CSS, Supabase

- Rebuilt a local agricultural business's ordering platform using Astro, TypeScript, and Supabase, implementing customer accounts, online payments, geolocation, and ordering functionality for an upcoming seasonal deployment. Expecting to handle over 700,000 orders across 30 states

Wildfire Mapping Application | Python, n8n, APIs, Mapping

- Supported evacuation planning for approximately 100 home-care patients by developing a Python-based application that mapped patient locations against wildfire and evacuation information.

Wildlife Survey Platform | React, TypeScript, Supabase

- Developed a QR-code-based wildlife reporting PWA for Jefferson County's 275-mile trail network, providing a digital alternative to phone-based reporting and implementing features based on engineering specifications.

Technical Skills

Languages: Python, C#, JavaScript, TypeScript, HTML, CSS
Frameworks and Platforms: Astro, React, Vite, FastAPI, Supabase, Unity, OpenXR, XR Interaction Toolkit, Vite PWA
Tools and Systems: Git, GitHub, n8n, APIs, JSON, Windows
